Professional Summary

Computer Science undergraduate skilled in Python, SQL, statistics, data analysis, and problem-solving with hands-on experience in predictive modeling, backend development, workflow automation, and REST API integration.

Education

International Institute of Information Technology, Pune — Aug 2023 – May 2027
Bachelor of Engineering in Computer Science Engineering — **CGPA: 9.16**

Higher Secondary Education (12th) — 2022
Nutan Vidya Prasarak Mandal's Arts, Commerce & Science College, Lasalgaon — **88.50%**

Secondary Education (10th) — 2020
Savitribai Phule Madhyamik Vidyalay, Somthandesh — **85.60%**

Skills

Programming Languages: Java, SQL, Python, C, C++

Data Analytics & Machine Learning: Data Analysis, Statistics, Predictive Modeling, Data Processing, Pandas, NumPy (Numerical Python), scikit-learn

Web & Backend Development: Thymeleaf, HTML, CSS, Spring Boot, REST APIs, JPA, Flask

Databases & Cloud: MySQL, PostgreSQL, MongoDB, AWS (EC2), Cloud Computing

Core Computer Science: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering

Automation & Testing: Web Scraping, BeautifulSoup, API Testing, Unit Testing

Libraries: NumPy, Pandas, Matplotlib, Scikit-learn

Tools: Postman, Git, GitHub, Docker, Visual Studio Code, Jupyter Notebook, Render, Eclipse, IntelliJ IDEA

Experience

Web Developer Intern | Appwizer Solution (OPC) Private Limited — Jan 2026 – June 2026

- Developed web scraping pipelines using Python and BeautifulSoup, extracting and processing 10K+ records into structured datasets.
- Automated data extraction workflows, reducing manual effort by 60% and improving operational efficiency.
- Contributed to frontend and backend integration for web workflows supporting 1K+ user interactions.
- Managed website hosting and deployment using WordPress and Hostinger.
- Collaborated with development team members during workflow implementation, testing, and issue resolution.
- **Project Links:** GitHub | Live Demo

Projects

Attendance Tracker System — GitHub

- Developed an attendance management system to maintain and track student records.
- Built REST APIs and integrated MySQL database for efficient data storage and retrieval.
- Implemented structured database workflows and validation processes for efficient attendance management.
- Performed debugging and API testing to ensure reliable system functionality.
- **Technologies:** Java, Spring Boot, MySQL, JPA, REST APIs

Movie Recommendation System — GitHub

- Developed a content-based movie recommendation system using movie metadata including genres, keywords, cast, director, and overview.
- Preprocessed and analyzed movie metadata using Pandas and NumPy, including handling missing values and extracting relevant features from JSON-formatted attributes.

- Combined movie attributes into a unified feature representation and applied CountVectorizer with 5,000 features and English stop-word removal for text-based similarity analysis.
- Built a recommendation pipeline using scikit-learn to identify movies with similar characteristics based on their extracted feature representations.
- **Technologies:** Python, Pandas, NumPy, scikit-learn

Online Shopping Cart GitHub

- Developed a full-stack e-commerce application using Java, Spring Boot, Thymeleaf, MySQL, and JPA, implementing product, cart, user, and order management.
- Implemented Spring Security for authentication, role-based access, password encryption, account locking, and secure user management.
- Added product search, category filtering, pagination, order-status tracking, and Docker-based containerization for application deployment.
- **Technologies:** Java, OOP, Spring Boot, Spring Security, JPA, MySQL, Thymeleaf, Docker
